

Pranav Bongane

Backend Developer | .NET & Python

pranavmbongane@outlook.com | +91 93592 38639 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Professional Summary

Results-driven Backend Developer with 3+ years of hands-on experience building secure, scalable, and high-performance web applications in the FinTech and payment systems domain.

Expert in C#, ASP.NET Core, RESTful APIs, Entity Framework Core, and microservices. Delivered production-grade solutions with PCI-DSS compliance, 3DS authentication, and integrations with Shopify, WooCommerce, and Magento.

Reduced client onboarding time by 40% through automation and improved API response times by 35% using async processing and caching. Currently expanding expertise into modern Python backend development with FastAPI, Django, SQLAlchemy, and PostgreSQL while actively building full-stack applications.

Technical Skills

Languages: C#, Python, SQL, JavaScript

.NET Backend: ASP.NET Core 6/7/8/9, Web API, Minimal APIs, Entity Framework Core, LINQ, Async/Await

Python Backend: FastAPI, Django, SQLAlchemy ORM, Pydantic, PostgreSQL, REST APIs, Tkinter

Architecture & Security: Microservices, Clean Architecture, PCI-DSS, 3DS Authentication, JWT, Tokenization

Databases: SQL Server, PostgreSQL

Tools & Others: Docker, Git, Postman, Swagger, Serilog, Redis Caching, AWS (Lambda, API Gateway - Learning)

Professional Experience

Software Engineer

Xchange Data Technology (Client: InterPay, Saudi Arabia)

June 2022 – Present

Sangli, Maharashtra

- Designed and developed PCI-DSS compliant payment processing platform using ASP.NET Core microservices.
- Improved API response time by 35% through asynchronous programming, caching strategies, and EF Core query optimization.
- Automated merchant onboarding workflows, reducing manual effort by 40%.
- Implemented 3DS authentication, card tokenization, and secure handling of cardholder data.
- Developed webhook-based services for real-time transaction synchronization with external systems.
- Containerized backend services using Docker for consistent deployments.
- Collaborating on migration of REST APIs to AWS Lambda and API Gateway for serverless scalability.
- Worked closely with QA, frontend, and mobile teams to maintain stable API contracts.

Key Projects

InterPay Payment System

ASP.NET Core | Microservices | FinTech

- Built secure REST APIs for sale, refund, and cash-advance transactions with full PCI-DSS compliance.
- Implemented tokenization, encryption, and structured logging for improved observability.
- Designed modular microservices enabling independent scaling and faster feature releases.

Product CRUD Application (Full-Stack)

FastAPI | React | PostgreSQL | SQLAlchemy

- Built a complete RESTful Product Management system with FastAPI backend, async endpoints, and Pydantic validation.
- Designed database models using SQLAlchemy ORM with PostgreSQL and configured CORS for React frontend integration.
- Implemented full CRUD operations with proper error handling and API documentation via Swagger UI.
- Demonstrated modern Python backend development practices and seamless full-stack communication.

ERP Web Application

ASP.NET MVC | SQL Server

- Developed full-stack ERP system with OTP authentication, billing, inventory, and payment gateway integration.

Certifications

- Foundational C# — Microsoft (freeCodeCamp)
- PCI Awareness for Point-of-Sale Employees (2025)
- PCI General Awareness Training (2025)
- AWS Certified Cloud Practitioner — In Progress (Target: May 2026)

Education

Bachelor of Business Administration (BBA)

Bharati Vidyapeeth Deemed University, Sangli

2018 – 2021
